The Final VAMDC project meeting has occurred at the Observatoire de Paris hosted by partner CNRS-Observatoire de Paris. The meeting opened at 9:30 on Wednesday 14th November 2012, and close at 15.30 on Friday 16th November 2012.

A fee was received in order to cover the expenses for the meals (invited guest did not pay anything) in order to optimise organisation at meal time with no payment by individuals on site). The fees will be indicated as receipt in the reporting.

The program was organised to give a general overview of VAMDC achievements and an overview of the roadmap for the future. Therefore we had external speakers from application fields, from new producers, having sessions on close fields such as environment, chemistry, condensed phase, having sessions on evaluation of data, on outreach. 2 Technical parallel session were organised in order to access what should be done in the next year. A poster session was organised in order to present achievements of all partners who could not give oral presentations.

The program and the different talks can be found at <u>http://vamdcmeeting.sciencesconf.org/</u> and at the end of this document (or at <u>http://voparis-twiki.obspm.fr/twiki/bin/view/VAMDC/PmCycleFour</u> for download of presentations)

Board/SAB Meetings

The Board Meeting VPB5 was joined with the SAB final meeting and occurred during the final annual meeting = see page

http://voparis-twiki.obspm.fr/twiki/bin/view/VAMDC/VpbPlenaryNovember2012 and http://voparis-twiki.obspm.fr/twiki/bin/view/VAMDC/SmCycleThree

<u>Main subject of debate</u> was sustainability beyond 2012, participation of partners in sustainability plan and creation of a legal entity, connection to Reuter, connection to World Data System.

Minutes and Actions:

Board was not very active in proposing support of future VAMDC Infrastructure and in setting up a legal entity. Of course it was decided that we should pursue the ERIC possibility because UK agrees to go ahead as long as somebody else leads the ERIC. Unfortunally France has not been responsive up till now. It was proposed to set up a simple association as an initial step, while we work on building an ERIC during SUP@VAMDC. N. Mason (OU) proposed to write a draft of status. We agreed that Reuters connection might not be interesting for VAMC, but interesting for individual databases (this would require extra work, but it is independent of VAMDC). The operational organisation of VAMDC Consortium was agreed (as found in the slides). Connection to World Data System was not seen as interesting for now.

The SAB has done its own report on <u>http://voparis-</u> twiki.obspm.fr/twiki/bin/view/VAMDC/SmCycleThree
