

CNRS/VOPARIS

<http://vo-web.obspm.fr/>

**Contact person :** P. Le Sidaner

**VOPARIS Data Centre** is a federative infrastructure linked to the departments and the computer centre of Paris Observatory. It is strongly involved in Virtual Observatory activities covering many disciplines in astrophysics, molecular physics, solar physics, etc.. VOPARIS Data Centre has a staff of 4 engineer with an infrastructure including computing power linked to the EGEE grid, storage facilities and servers (more information on VOPARIS Data Centre is provided in Section on Resources to be committed).

**Key persons :**

**P. Le Sidaner** Research Engineer, Computer Centre, VOPARIS Data Centre.

Expertise: Project Manager of VOPARIS Data Centre and for Vorg at Observatory of Paris.

Role in VAMDC project: Coordinator of SA2. Infrastructure at VOPARIS Data Centre (network, storage, computing facilities) in SA1 and SA2.

**A. Shih** Research Engineer, Computer Centre, VOPARIS Data Centre

Expertise: System Engineer

Role in VAMDC project: Infrastructure at VOPARIS Data Centre (network, storage, computing facilities, Contact with EGEE) (SA1) (SA2)

**A. Marchand** Research Engineer, Computer Centre, VOPARIS Data Centre

Expertise: Scientific computing, System Engineer

Role in VAMDC project: User Support at VOPARIS Data Centre (Porting Codes to the GRID)(SA1) (SA2)
