

CNRS/LAB

Contact person : [V. Wakelam](#)

Laboratoire d'Astrophysique de Bordeaux (LAB) is part of the Observatoire Aquitain des Sciences de l'Univers (OASU, UMS 2567), which groups several laboratories involved in astronomical and Earth sciences. LAB is part of several international astrophysical projects such as ALMA and is currently developing a strong expertise in astrochemistry.

Key persons :

V. Wakelam Associate researcher

Expertise : modelisation of chemical species in interstellar medium, identification of key reactions in chemical networks .

Role in VAMDC : Project leader of the Kinetic Database for Astrochemistry, scientific leader of the astrochemical dictionary.

A. Caillo Research Engineer

Expertise : Database, Software development

Role in VAMDC : Development leader of the Kinetic Database for Astrochemistry.
