

The Centre for Astrophysics from Harvard University

**Partner contact person** : Prof. Larry Rothman

Where the HITRAN database is currently maintained by **Prof. Larry Rothman**. HITRAN is a

central database for use in atmospheric and planetology applications, and many teams from the EU and from the Russian Federation contribute to providing data for input in this database (some of them are partners of our consortium (UCL, CNRS/GSMA, CNRS/LPMAA, IAO). Resources linked to UCL will support this external partner.
